PROFESSIONAL SKILLS

Knowledge:

Data Structures & Algorithms,
Object-Oriented Programming
(OOP), Agile/Scrum, Web
Architecture, Database Design
(Relational & Non-relational),
RESTful API Design.

Technical Skills:

JavaScript, TypeScript, React.js,
Node.js, HTML5/CSS3, MySQL,
MongoDB, Git/GitHub, VS Code.

Core Competencies:

Problem solving, logical thinking,
teamwork, adaptability, critical
thinking.

LANGUAGES

English - Able to read technical
documentation and communicate
basic technical concepts in
professional settings.

ABOUT MYSELF

Final-year IT student passionate about fullstack web development. Skilled in frontend frameworks, backend API design, database management, and Git. Fast learner with strong problem-solving skills. Seeking a Fullstack Engineer Internship to apply technical skills to practical projects, aiming for a Full-time Software Engineer role upon graduation in 2027.

EDUCATION

Hanoi University of Science and Technology (HUST)

2023- PRESENT

Major: **Computer Science (IT1)** | Final-year Student

Relevant Coursework: Data Structures & Algorithms, Web Application
Development, Database Systems, Software Architecture.

KEY PROJECTS

Residential Management System (QuanLyDanCu) | BE & FE Developer

- Description: Built a React & Node.js web app for resident management with JWT authentication and role-based access.
- Key Tasks: Developed RESTful APIs, database schemas, audit logging, and designed the UI & backend for Reward Management.

Mini Map Pathfinding Application | Frontend & Algorithm Developer

- Description: Built a GIS navigation web app in Flask & Leaflet.js to find optimal routes under real-time traffic conditions.
- Key Tasks: Designed the interactive Leaflet.js map UI and implemented pathfinding algorithms (Dijkstra, A*) with dynamic road-weighting logic.

Face Anti-Spoofing Detection | Frontend UI Developer

- Description: Developed the web interface for a PyTorch deep learning system designed to detect face spoofing attacks.
- Key Tasks: Designed and implemented a responsive UI for users to upload images/videos and display real-time anti-spoofing inference results.

A Better World (Java RPG Game) | UI/UX & Music Designer

- Description: Designed intuitive game interfaces and composed original audio/soundscapes for a Java 2D RPG game (OOP HUST Project).
- Key Tasks: Crafted player UI layouts, enhanced user experience (UX) for menus/combat screens, and designed immersive music for game environments.

EXTRACURRICULAR ACTIVITIES

**HUST Student Association Volunteer Team - Management Board
Member**

2023- 2025
